WordPress Engineer

Dedicated and innovative third-year BTech student at Sreyas Engineering and Technology College, specializing in both front-end and back-end development. Possessing a strong foundation in programming languages such as HTML, CSS, JavaScript, and proficiency in backend technologies.

Driven by a passion for creating seamless and user-friendly applications, I am adept at translating design concepts into functional, responsive, and efficient web solutions. As a quick learner with a commitment to staying updated on emerging technologies, I am eager to apply my skills and contribute to dynamic projects in a collaborative team environment.

While currently in the academic phase, I am actively seeking opportunities to apply my theoretical knowledge in real-world scenarios, grow as a developer, and make a positive impact. With a keen eye for detail and a commitment to delivering high-quality code, I am excited about the prospect of contributing to innovative projects and expanding my skills in both front-end and back-end development.
